DISCUSSION:

DaimlerChrysler Corporation is now offering a passenger airbag deactivation wiring package for the selected vehicles listed above. The wiring package is a kit containing all necessary parts and a detailed instruction sheet. In the U.S., under the National Highway Traffic Safety Administration's rule, consumers will be authorized for airbag deactivation by claiming they meet any of several criteria. Passenger airbag deactivation must not be installed without the vehicle owner presenting the NHTSA authorization letter. For more information concerning the authorization process and/or the authorization letter call NHTSA's Auto Safety Hotline at 1-800-424-9393. We encourage you (dealer) to install these wiring packages when the customer is interested in doing so and has the necessary NHTSA authorization.

DEACTIVATION/DOCUMENTATION PROCEDURE:

1. Before you install any passenger airbag wiring package for owners of airbag equipped vehicles, the owner **must** present to you an "Authorization Form" from the U. S. Department of Transportation National Highway Traffic Safety Administration (NHTSA), certifying the specific vehicle by its vehicle identification number. The authorization applies **only** to the vehicle identified and not to other vehicles that the owner may have.
2. The owner **must** complete the "Authorization to Install Airbag On-Off Switch Release Agreement Form" available in DealerCONNECT. Reference: efiles, Service, TechCONNECT, Misc. Documents and printed on your dealership letterhead. Keep a copy for your records and make a copy for the vehicle owner.
3. Complete the NHTSA authorization form, and return it to NHTSA within seven days, making copies for the owner's and your records.

NOTE: ALL DEALER OWNED USED VEHICLES SHOULD BE INSPECTED FOR AIRBAG DEACTIVATION JUMPER AND FOR PROPER AIRBAG OPERATION, PRIOR TO RESALE.
